What happens when we remember together?

We like to remember good things in life and revive the moments of togetherness, connection, understanding and acceptance. When we revive it in here and now we affirm the relations. Analytic group also has memories. Group remembers. When do memories arise? How? How do we share unpleasant memories, traumas, when, with whom? How they affect others? What remembering does? Disclosure of dark parts of yourself, confronting them shows maturity of the individual, of the group; how does a group, individual work through?
